

RHINO D2: Instant Connectivity. Simplified Management.

Deploy devices faster with zero manual setup.

- Preloaded connectivity allows devices to come online instantly
- Automatic eSIM enrollment on first power-up
- No IT intervention required—plug in and go
- Works across major US carriers & MVNOs

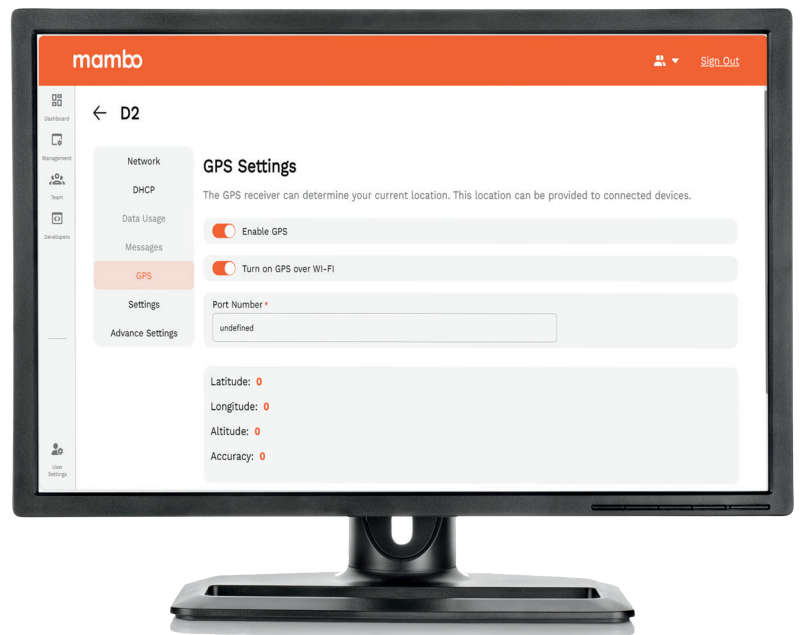

Smart Connectivity Control

- Enable/disable GPS & location tracking
- Adjust data roaming and network settings
- Configure operator selection manually or automatically
- Secure access via web-based UI (password controlled)

Manage with Mambo®

- Centralized control for your entire fleet
- Remote device management across deployments
- Over-the-air updates (FOTA) for firmware and security
- Device grouping, monitoring, and diagnostics
- Secure connectivity management via Mambo Cloud
- Supports eSIM lifecycle management and provisioning

Plug-and-Play Efficiency

- Simple USB connection (no install required)
- Adds 5G & LTE connectivity to any device
- Supports legacy and modern hardware environments
- Built on a lightweight Linux-based system (OpenWRT) for reliability

Faster rollouts
with zero-touch
provisioning

Lower operational
costs with remote
management

Flexible connectivity
across networks and
devices

NEXA® (formerly Social Mobile) is an enterprise mobility solutions provider who designs, engineers, and manages custom mobility solutions for clients in all industries from healthcare to retail to defense. We are a validated Android Enterprise Gold partner, Android validated device manufacturer, Play Protect certified partner, Android Enterprise Recommended EMM, and Zero-touch enrollment partner.
